Colin Dunne Masterclass Weekend

Hannover 1-3 December 2023

The internationally renowned dancer, choreographer, and teacher Colin Dunne will come to Hannover for the very first time to teach a series of classes.

All classes will be taught in heavy shoe technique. Colin's classes focus on the release of unnecessary tension in the body, the art of listening, and finding joy and pleasure in movement that makes sound.

With the focus being solely on heavy shoe, dancers will develop their skills in timing, rhythm, musicality, speed, and complexity.

There are two levels of classes to choose from.

Dancers should consider which level they are best suited to, to gain the most benefit from the workshop.

If after the first class, Colin feels that a dancer should change level for the second day, he will advise you.

Level I

Level I is most suited to primary and early intermediate dancers who are still learning how to dance simple combinations of steps in time to music. In this class, you will be working with more basic movements and rhythms in order to create a solid technical foundation. This level is also beneficial for more advanced dancers who would like to take the time to revisit their underlying technique, and for dancers who are interested in teaching.

Level II

Level II is suited for late intermediate and advanced dancers who are already able to dance comfortably in time to music. You will be working with more complex movements and rhythmical patterns and developing a greater awareness of musicality, flow, and style. In this class, we will also pay more attention to the structure of the melody in the music.

Improvisation for Traditional Irish Dancers

This class will introduce the practice of rhythmical improvisation in heavy shoe. Colin will lead you through a series of exercises and tasks and you will begin to create your own unique movement and rhythmical patterns to music, instantaneously. Improvisation allows you to explore creative possibilities with your technique!

This class is only recommended for dancers who have a good understanding of and technical proficiency in timing.
